

BOOTIES SIZING GUIDE

For Wettie Neoprene Socks & Kevlar Booties.

Sizing is men's US shoes. Wettie booties are designed to be a very snug fit with the heel seam sitting just under the heel. This is to eliminate this seam rubbing while wearing fins. If you are in between sizes, we suggest going up a size. Sizing recommendations are also modelled off the stretch allowance of a 3mm bootie, if you are choosing 5mm or thicker we suggest going up a size.
